The Flower Bud in the Bull ONLY Living FLOWER BUDS ARE SURE TO BLOOM

LIVING FLOWER BUDS MUST BE PRESENT IN BULBS AT PLANTING TIME

If you cut through a flower bulb in the fall, you will find the embryo of the flower inside the bulb and complete in every detail, as the Tulip bulb photograph above illustrates. This is the actual flower which will bloom in your garden next spring! This embryo flower begins to grow during the summer months and is nurtured on the Holland bulb farms. It is most important that the bulbs are properly handled to encourage the proper development of the embryo.

FLOWER BULBS MUST BE PROTECTED

After the bulbs are harvested, it is essential that the flower bud which has started to grow is carefully guarded. Our bulbs are thus protected by keeping them at proper temperatures and the right atmosphere. In addition, no machines are used which might cause injury to the bulb and embryo. It's all hand labor -a real labor of love, which results in each bulb being a perfect specimen capable of superior performance.

DELIVERY: Our prices include all transportation charges and arrival of the bulbs in good condition at your address.

ALL BULBS EXPERTLY PACKED AND HANDLED

Your bulbs come direct from the bulb farm in Holland. Bulbs are dug at the proper time and taken care of by experts after harvesting so that the embryo flower in the bulb is well preserved. Only top-quality bulbs are selected, and these are individually packed in special bags which keep the bulbs in best condition. You receive the bulbs just as they come from Holland, in fresh and healthy condition.

PRIOR TO SHIPMENT FROM HOLLAND THE BULBS ARE IN-SPECTED BY BOTH THE AMERICAN AND DUTCH AGRICULTURAL INSPECTORS FOR SIZE, QUALITY AND DISEASE.

YOU RECEIVE YOUR BULBS IN PERFECT CONDITION WHEN ORDERED FROM THIS CATALOG

All the Holland bulbs you receive through us are sure to bloom and are true to name because they are grown and handled with just that in mind-that they will grow for you and provide you with the most beautiful spring garden you've ever had! It's easy, too, when you follow the simple planting instructions and suggestions which are enclosed with every shipment. These instructions must be carefully followed, and naturally our liability is limited to the purchase price of the bulbs.

EXHIBITION HYACINTHS

These large-size bulbs produce enormous flower spikes, densely packed with dainty, bell-shaped flowers and highly perfumed. The following varieties are especially recommended for pots and window boxes, as well as for garden use.

BISMARCK. Sky-blue. CITY OF HAARLEM. Yellow. JAN BOS. Bright red.

PINK PEARL. Pink QUEEN OF THE WHITES. White.

3 for 95c 10 for \$2.80 50 for \$11.75

EARLY-FLOWERING TULIPS

Among the most welcome sights in spring is the bursting in bloom of the Early-flowering Tulips. They commence to bloom in April and provide a variety of brilliant colors in the garden till the May-flowering Tulips take over the crown of beauty. They are exceptionally valuable for planting in formal beds or in front of evergreens. The tall varieties bloom a little later than the attentions.

LYCORIS

Magic Lily of the Orient

Known as the "Hardy Amaryllis," they produce daffodil-like foliage in spring. This dies down in early summer and, as if by magic, a flower spike suddenly appears in August. The soft pink, lily-like flowers are delightfully fragrant and are carried on 2 to 3-foot stems. Perfectly hardy; once established, they reappear each year.
